

User Guide

Overview:

The clip is a double spring structure up and down, both ends of the clip can be stretched when in use

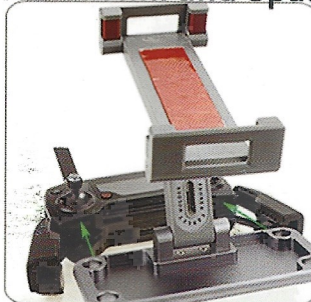

The clip can be rotated 360 degrees horizontally, phones and smaller tablets need to rotate the clip to the horizontal direction to use

Used as a remote controller holder for Mavic Air 2, DJI Air 2S, DJI Mini 2

The side of the base with arms is near the top of the antenna or near the remote controller. Both modes can be used. It can be flexibly adjusted according to your usage habits. As shown in Picture 1 and Picture 2.

Used as a remote controller holder for Mavic 2, Mavic Pro, Mavic Air, Mavic Mini and Spark

Put the side of the base with the arm into the mobile device clamps of the remote controller in the direction of the arrow
